## **ADJUSTMENT BUDGET**

**2014/15 FINANCIAL YEAR**

## PART 1 – ADJUSTMENT BUDGET

### EXECUTIVE SUMMARY

The application of sound financial management principles for the compilation of the municipality's financial plan is essential and critical to ensure that the municipality remains financially viable and that municipal services are provided sustainably, economically and equitably to all communities.

Section 28 of Municipal Finance Management Act requires Municipality to revise its approved annual budget through an adjustment budget. The format and contents of the adjustment budget and supporting documentation must in terms of MFMA, be in the format as specified in Schedule B of the Municipal Budget and Reporting Regulations. The adjustment budget as submitted herewith contains the applicable adjustment budget tables.

It should be noted that municipal tax and tariffs may not be increased during a financial year and any amendments to the annual budget must remain funded in accordance with section 18 of the MFMA.

The impact of adjustment budget on the approved annual budget is as follows:

- Revenue budget increased from R330, 957, 600 to R344, 936, 270 reflecting 4, 22% increase.
- There was a slight upward adjustment on operational expenditure from R291, 496, 838 to R304, 786, 694 reflecting a 4, 56% increase.
- Capital expenditure budget has been adjusted from R77, 290, 000 million to R84, 383, 370 reflecting 9, 18% increase.

The above B1 table summarizes the impact of adjustment budget on the approved annual budget.

### Operating revenue

For Municipality to continue improving the quality of services provided to its citizens it needs to generate the reasonable revenue and as a result, strong revenue management and stringent expenditure management is fundamental to the financial sustainability of the municipality. The reality is that the municipality is faced with development backlogs and growing debt book.

The actual revenue received for the period July 2014 to December 2014 was used as departure point to determine whether the original revenue budget was realistic and whether it can be achieved. Where this was found not to be the case, an adjustment was made to the revenue budget for the 2014/15 financial period to ensure a true reflection of the actual amounts to be received.

- **Property rates** – this revenue line item has decreased from R30 million to R24, 500 million and the decrease resulted from an increase in revenue forgone and correction of municipalities own properties been levied.
- **Service charges** – This line item reflects a net increase of R 4, 8 million with the increase of R 7, 4 million from electricity and a decrease from refuse and other service charges of R 1, 2 and R 1, 3 million respectively.
- **Rental of facilities** – the budget increased by R2, 030 million to R 3,060 million as it was originally under-budgeted.
- **Interest earned on external investments** – the budget is increased by R1, 460 million to R4, 280 million and the budget was originally under-budgeted.
- **Interest on outstanding debtors** – the budget was originally understated and it was therefore increased by R2 million to R7 million.
- **Fines** – the budget was originally over-stated and it was therefore adjusted downward to reflect realistically anticipated revenue.
- **Licenses and Permits** – this line item has a slight increase of R353 thousand as a result of more vehicle being registered.
- **Other revenue** – the budget had a slight downwards adjustment and this budget was decreased by R 73 thousand. The line items affected includes building plan fess, consent use and subdividing costs.

### Operating expenditure

- **Employee related cost** – the budget has been adjusted downwards by R3, 569 million to R93, 609 million and this adjustment was informed by savings from vacant positions that were budgeted for and were not filled in the half of the financial year and this gave rise to downward budget adjustment of 3, 6% decrease. The errors were however, corrected in this adjustment budget.
- **Bulk purchase** – the budget for bulk purchase has increased from R 47 million to R 54, 3 million which reflects a 15, 53% or R 7, 3 million increases. The bulk purchase pertains to purchase of electricity.

- **Other materials** – Other materials has decreased from R 3 million to R 1, 7 million which reflects R 1, 300 million decrease from the original budget.
- **Contracted services** – the original budget appeared to have been under budgeted as compared to the actual expenditure incurred and the budget was therefore increased by R 10, 805 million to R 19, 505 million.
- **Transfers and Grants** – transfers and grants have been adjusted downward from R 9, 6 million to R 1, 9 million which results from of indigents correctly mapped on the system
- **Other expenditure** – there is a slight decrease on this line item of R622 thousand to R 71, 111 million

### Capital expenditures

The capital projects are classified as according to their asset type and the proportion thereof for 2014/15 financial year is as follows:

- Community assets (3, 31%)
- Infrastructure assets – Electricity (13, 89%)
- Infrastructure assets – Road transport (72, 06%)
- Infrastructure assets – Other (0, 65%)
- Other assets (9, 78%)

## Capital expenditure

The capital expenditure budget has increased from R 77, 290 million to R 84, 383 million reflecting a 9, 18% increase. The additions that caused an increased capital budget include amongst others:

- Upgrading of ICT network system R 300, 000
- Air cons R 100, 000
- ICT disaster recovery site R 1, 000, 000

The above two tables (Table B2 and B3) summarize present comparison of original budget and adjusted budget for both revenue and operating expenditure. The budgeted revenue has increased from R330, 958 million to R344, 936 million reflecting 4.22% increase while operating expenditure has increased from R291, 497 million to R304, 786 million showing 4, 56% increase. The net effect of the adjusted budget is a surplus of R40, 650 million that took into consideration non cash item (depreciation and debt impairment) amounting to R 44, 500 million. Taking off the depreciation and debt impairment amounts, the budget reflects a surplus of R85, 150 million. Cognizance should be taken that revenue presented in the above two tables takes into account transfer recognized capital and so it does not balance to operating revenue shown in Table B4.

The above graphs present comparison of original and adjusted budget for revenue (by source) and expenditure (by type).

#### Revenue

Revenue to be generated from property rates, service charges and transfers and grants form a significant percentage of the revenue basket of the municipality. These revenue sources comprise 91, 77% of the total revenue mix. From the below diagram, one would notice that the municipality is reliant on grants since the transfers recognized operational alone contribute 59, 83% to the budgeted revenue while 70, 26% of the capital budget is funded from grants.

The impact of revenue budget adjustment on revenue sources is as follows:-

Revenue sources not affected by budget adjustments:

- Fines; and
- Transfers Recognized- operational

**Revenue sources adjusted upwards:**

- Service charges – electricity ( 13, 38% )
- Rental of facilities and equipment (197, 08%);
- Interest on external investment (52, 14%); and
- Interest on outstanding debtors (40%).
- License and permits (6, 23%)

**Revenue sources adjusted downwards:**

- Property rates (18, 33%);
- Service charge – refuse (24, 11%)
- Service charge – other (52, 35%)
- Other revenue (5, 23%).

## Expenditure

Employee related cost, other/general expenditure and bulk purchases are the major components or expenditure types under operating budget.

The impact of operating expenditure budget adjustment on expenditure types is as follows:-

All operational expenditure items were affected by an adjustment:

### Expenditure items adjusted upwards:

- Remuneration of Councilors' (8, 09%)
- Debt impairment (266, 67%)
- Bulk purchases (15, 53%)
- Contracted services (124, 20%)

### Expenditure items adjusted downwards:

- Employee related cost (3, 67%)
- Depreciation (4, 29%)
- Other material (42, 52%)
- Transfers and grants (79, 79%)
- Other expenditure (0, 87%)

Table B5 is a breakdown of the capital programme in relation to capital expenditure by municipal vote (multi-year and single-year appropriations), capital expenditure by standard classification, and the funding sources necessary to fund the capital budget, including information on capital transfers from national departments.

The MFMA provides that a municipality may approve multi-year or single-year capital budget appropriations. In relation to multi-year budget appropriations for 2014/15 financial year, R50, 761 million has been allocated of the total R84, 383 million capital budget, which totals to 60, 16%. This allocation escalates to R79, 215 million in 2015/16 and then to R86, 623 million in 2016/17.

The single-year capital expenditure budget has been appropriated at R33, 622 million (39, 84% of the total capital budget) for the 2014/15 financial year and decreases to R18, 129 million in 2015/16 and then R 5, 000 million in 2016/17

Unlike the multi-year capital appropriations, single-year appropriations relate to expenditure that will be incurred in the specific budget year such as office furniture, ICT equipment, other equipment, vehicles, etc. The budget appropriations for two outer years are indicative allocations based on departmental needs and will be reviewed on an annual basis to assess the relevance of the expenditure in relation to the strategic objectives and service delivery imperatives of the municipality. For the purpose of funding assessment of the MTREF, these appropriations have been included but no commitments will be incurred against single-year appropriations for the two outer years.

The above graph reflects how the capital expenditure budget will be funded after the adjustment budget. The sources of funding for capital budget are as follows:

- Municipal Infrastructure Grant R 50, 840 million
- Municipal Infrastructure Grant Roll Over R 4, 986 million
- Integrated National Electrification Programme Grant R3, 988 million
- Internally Generated Revenue R24, 569 million

The above sub-table indicate that surplus on operating budget after taking out non cash item (depreciation) amounts to R24, 435, 679 that is sufficient enough to fund internally funded projects of R24, 569, 312 (2014/15), R64, 017, 291 to fund internally funded projects of R35, 742,715, and R64, 030, 416 to fund internally funded projects of R35, 677, 729. The surplus from operating budget appear to be exceedingly high relative to portion of capital projects to be funded internally implying that more capital projects can still be accommodated into the capital budget since funding is not a challenge. The table above portrays a picture that clearly shows that the municipality does not need to secure external borrowings in order for it to fully fund the capital budget.

Table A6 is consistent with international standards of good financial management practice, and improves understandability for councilors and management of the impact of the budget on the statement of financial position (previously known as balance sheet).

This format of presenting the statement of financial position is aligned to GRAP1, which is generally aligned to the international version which presents Assets less Liabilities as “Accounting” Community Wealth. The order of items within each group illustrates items in order of liquidity; i.e. assets readily converted to cash, or liabilities immediately required to be met from cash, appear first.

Table B6 is supported by an extensive table of notes (supporting table SB2) that provide detailed analysis of the major components of a number of items, including:

- Call investments deposits;
- Consumer debtors;
- Property, plant and equipment;
- Trade and other payables;
- Provisions non-current;
- Changes in net assets; and
- Reserves.

The municipal equivalent of equity is Community Wealth/Equity. The justification is that ownership and the net assets of the municipality belong to the community. Any movement on the Budgeted Financial Performance or the Capital Budget will inevitably impact on the Budgeted Financial Position. As an example, the collection rate assumption will impact on the cash position of the municipality and subsequently inform the level of cash and cash equivalents at year end. Similarly, the collection rate assumption should inform the budget appropriation for debt impairment which in turn would impact on the provision for bad debt. These budget and planning assumptions form a critical link in determining the applicability and relevance of the budget as well as the determination of ratios and financial indicators. In addition, the funding compliance assessment is informed directly by forecasting the statement of financial position.

The budgeted cash flow statement is the first measurement in determining if the budget is funded. It shows the expected level of cash in-flow versus cash out-flow that is likely to result from the implementation of the budget. The cash and cash equivalents increase because of healthy increases in operational activities due to implementations of various interventions, i.e. extensive debt collection drive. The 2014/15 MTREF has been informed by the planning principle of ensuring adequate cash reserves over the medium-term. Cash and cash equivalents totals to R15, 247 million (Actual) as at the beginning of the 2014/15 financial year and escalates to R41, 352 (Budgeted) as at end the financial year after the adjustment budget.

The cash backed reserves/accumulated surplus reconciliation is aligned to the requirements of MFMA Circular 42 – Funding a Municipal Budget. In essence the table evaluates the funding levels of the budget by firstly forecasting the cash and investments at year end and secondly reconciling the available funding to the liabilities/commitments that exist. The outcome of this exercise would either be a surplus or deficit. A deficit would indicate that the applications exceed the cash and investments available and would be indicative of non-compliance with the MFMA requirements that the municipality's budget must be "funded".

The end objective of the medium-term framework is to ensure the budget is funded aligned to section 18 of the MFMA. As part of the budgeting and planning guidelines that informed the compilation of the 2014/15 MTREF and considering the requirements of section 18 of the MFMA, it can be concluded that the 2014/15 MTREF is funded due to the significant cash surplus.

National Treasury has set a benchmark of 39% to 40% of the capital budget to be spent on renewal projects and this requirement is however not met since only 32, 28% is allocated to renewal of existing assets and this is partly attributed to the fact that the major capital budget funding (Municipal Infrastructure Grant) does not fund the rehabilitation of existing assets. The variance of 7,72% in meeting the renewal of existing assets benchmark will however be given thorough consideration in the 2015/16 budget cycle by ensuring that the municipality prioritize on these capital projects taking into account the available and excessive internal funding.
